

2016 Liberated Piecing Mystery

Clue #3

Sewing Your Bundles One at a Time.

This avoids confusing the similar looking but different sized pieces.

Double check the length of your liberated panel strips. Mine grew a bit from pressing. They should measure 42”.

Use 1/4” seams throughout.

Make sure you pin the seams before you sew.

- 1. Sew an accent fabric strip to each of the background strips along the 42” edge. Press to the accent fabric.**
- 2. Sew a liberated panel strip between two accent fabric edges from Step 1. Press to the accent fabric. See photo below.**

For the smaller quilt you will have (4) units and for the larger quilt you will have (8) units.

Each unit measure 14” by 42”.

If the 14” measurement is not exact DON'T TRIM.
